NMFS Contribution to San Joaquin Accord Goals v2.docx
Draft 2 DFG SJR Trib Settlement Goals 12-10-12.doc

Hi Ken,

I wanted to share with you the goals EPA is thinking of proposing for the SJR Settlement process. Let me know if you have any feedback on them. I will be sending them in tomorrow mid-day. If you have put together goals for waterboard to submit in this process I'd love to see those as well. Also included below are the CDFG and NMFS draft goals.

thanks

So here is what I have drafted as our goals. Please send me any thoughts/comments.
Below in the forwarded email are the draft goals from CDFG and NMFS. Art Baggett wanted them by today but since we don't meet until Thursday I'm sure another day won't slow anyone down.

Goals:

- A settlement should provide sufficient flows and appropriate timing of flows to attain and maintain beneficial uses along the tributaries and lower San Joaquin River. These uses include but are not limited to: wildlife; freshwater habitat, spawning and migration of warm and cold water fishes; irrigation; and municipal and domestic water supply.
- A settlement should provide sufficient flows to support the restoration of temperature and salinity impairments in the tributaries and lower San Joaquin River.
- A settlement should provide sufficient flow to support the restoration of viable populations of salmonids that eventually sustain harvest (Fall-run Chinook and Spring-run Chinook Salmon and Steelhead). This goal includes protecting viability of all life stages on each tributary. (this one is a shorter version of what CDFG is sending in).

Hi All,

DFG is pretty close with our goals. Attached is both our draft and the one Rhonda sent from NMFS. If you have any suggestions, please forward to me by 4:30 today, so I can forward DFG's Goals to Art by 5:00 today.

Rhonda, I think we line up pretty well, but I didn't know if you all wanted to make the above rim issues more explicit.

Stafford and Kevin (or others), give me a call if you need to for any background information.

Everyone has something to teach us, but only if we are wise enough to learn from them.

Hi all -

NMFS had an internal call with upper management today re:Dec 13 approach that Art is proposing, and his request for goals by Monday. the attached is What NMFS is thinking of, and we wanted to get some feedback before we press send on Monday, if possible. Key questions to y'all: 1) Do you think your management would support/agree with NMFS goals? If not- please advise us on your concerns. 2) Do you have preferred language, esp. for Fall-run, that we might all use?

Thanks, and I hope you may be able to get back to me by 1 or so on Monday. Have a good weekend. r2
